

project

Ambisonic Icosahedron

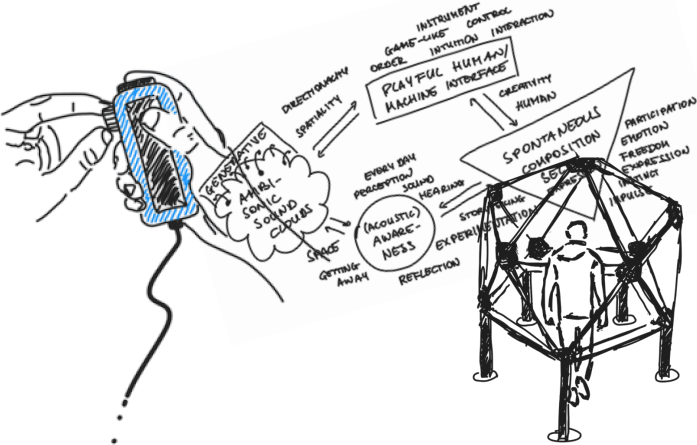

Is a participatory interactive art installation exploring spontaneous spatial composition using ambisonics and a custom motion sensing controller.

Paint in acoustic space

Use the custom controller to sculpt spatial microcompositions of fragmented audio

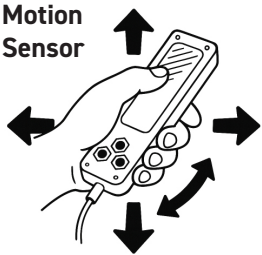

Deconstruct spatial audio scenes

Shine an ambisonic torchlight to explore parts of the scene

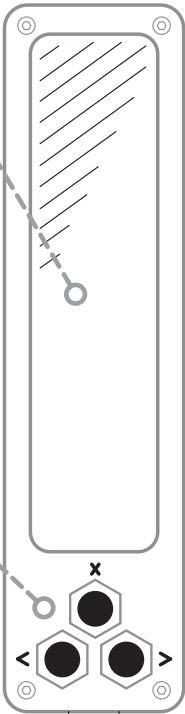

control

Touchslider
Shape sound appearance

Moving the controller around to place sounds.

Buttons
Control scene play-back and fire samples

Connector Cable
Don't break it pls
